WORK EXPERIENCE

Oracle Corporation - Java UI Developer

2022 - current

Redwood City, CA

- Developed a JavaFX-based UI for a critical business application, resulting in a **37% reduction in manual data entry errors and a 14% increase in overall productivity**
- Utilized Apache Maven for build automation, reducing build time by 32% and improving overall development efficiency by 21%
- Optimized database performance by integrating Spring Data, reducing average query times by 34% and overall system latency by 22%

Square - Web Developer

2019 - 2022

San Francisco, CA

- Implemented scalable microservices using Dropwizard, catering to 49,000+ users without performance degradation
- Enhanced the data security of the web application by implementing advanced encryption techniques using JavaFX, resulting in zero data leaks over 10 months
- Led a team to pinpoint performance bottlenecks using Apache JMeter, leading to a **29% boost in-app response times and an increase in app rating score on app stores by 1.6**

Cisco Systems - Technical Support Specialist

2016 - 2019

San Jose, CA

- Utilized IntelliJ IDEA for coding, **reducing bug-fixing time by 19%, thus decreasing software release time by 7%**
- Introduced Angular in front-end development, leading to a 22% improvement in application responsiveness for end-users and a 33% improvement in load time
- Implemented the Spring MVC framework for developing web applications, resulting in a 17% faster development time and an overall project completion rate improvement of 12%
